Subject: EU-OSHA Recommendation Letter

Dear Mr Dinis,

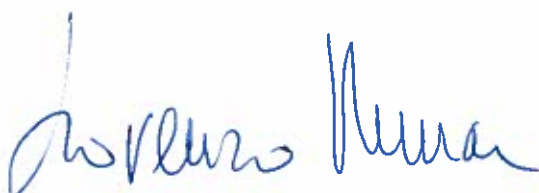

This letter is made in response to the request made from your side regarding the project +Agro Organizational, energy and occupational health and safety qualifications in the agrifood industry.

The European Agency for Safety and Health at Work (EU-OSHA) has followed the results of this project and their potential impact on the improvement of occupational safety and health (OSH) conditions within the industries of the agrifood sector. In particular, it is of great interest to us the use of risk assessment tools and the OSH best practice publications produced along the project's activities.

Since the intended computational tool will follow the structure and methodology of the OiRA (Online interactive Risk Assessment) tool developed by EU-OSHA and it will be included in the web platform maintained by the Agency, its dissemination will certainly contribute to extend the activities performed by the project's consortium.

Therefore, this letter is intended to support the development of this sectoral OiRA tool within the agrifood industry and it is made on a voluntary and cooperative basis without seeking any commercial or financial profit at all.

Yours sincerely,

Lorenzo Munar
Project Manager
Prevention and Research Unit
